B2B Sales Pipeline & Performance Analytics Dashboard

Technical Documentation & Business Impact Report

B2B Sales Pipeline Analysis | Power BI | Maven Analytics
8,800 Opportunities | 30 Agents | 85 Accounts | 7 Products

Metric	Value
Total Revenue	$10.01M
Win Rate	63.15%
Lost Rate	36.85%
Open Opportunities	2,089
Sales Agents	30
Managers	6
Accounts	85
Products	7
Regions	3

1. Project Overview

A comprehensive 6-page Power BI dashboard analyzing 8,800 B2B sales opportunities from a fictitious computer hardware company. The project covers sales team performance, agent efficiency, quarterly trends, product strategy, and account intelligence — built on a clean Star Schema data model with 15+ custom DAX measures.

Business Questions

#	Business Question
1	What separates top-performing teams from the rest?
2	Which agents are underperforming — and why?
3	How did sales momentum shift across quarters?
4	Which products drive the highest win rates?
5	Which accounts and sectors generate the most value?

Key Findings

Finding	Detail
Win Rate Drop	Win Rate dropped 21% from Q1 (82%) to Q2 (61%), driven by deal volume — not efficiency
Top Agent	Darcel Schlecht generates $1.15M — nearly 9x more than the lowest-performing agent
GTX Dominance	GTX Series accounts for 73% of total revenue across all regions
GTK Exclusive	GTK 500 is sold exclusively by Celia Rouche's team (West Region)
Seasonality	June is peak month ($1.34M); July is weakest ($700K)
Q2 Insight	Q2 peak revenue ($3.1M) driven by volume, not conversion efficiency
Best Sector	Technology sector shows best balance between Revenue and Win Rate

2. Data Model

Architecture: Star Schema

The data model follows a Star Schema pattern with 4 dimension tables connected to a central fact table. All relationships are One-to-Many (1:*) with Single direction filtering (Dimension → Fact).

Table	Type	Rows	Key Column	Joins To
sales_pipeline	Fact	8,800	opportunity_id	All Dimensions
accounts_dim	Dimension	85	account	sales_pipeline[account]
products_dim	Dimension	7	product	sales_pipeline[product]
sales_teams_dim	Dimension	35	sales_agent	sales_pipeline[sales_agent]
DateTable	Date Dim	Dynamic	Date	sales_pipeline[close_date]

Date Table DAX

```
DateTable = ADDCOLUMNS( CALENDAR( MIN(sales_pipeline[engage_date]),
MAX(sales_pipeline[close_date]) ), "Year", YEAR([Date]), "Month Number", MONTH([Date]),
"Month Name", FORMAT([Date], "MMMM"), "Quarter", "Q" & FORMAT([Date], "Q"), "QuarterYear",
"Q" & FORMAT([Date], "Q") & " " & YEAR([Date]), "Day", DAY([Date]), "Weekday Number",
WEEKDAY([Date], 1), "Weekday Name", FORMAT([Date], "dddd") )
```

IMPORTANT: Table Tools > Mark as Date Table > select [Date] column. Required for Time Intelligence functions to work correctly.

Column	DAX Formula	Purpose
Year	YEAR([Date])	Annual grouping
Month Number	MONTH([Date])	Correct month sorting
Month Name	FORMAT([Date], "MMMM")	January, February...
Quarter	"Q" & FORMAT([Date], "Q")	Q1 / Q2 / Q3 / Q4
QuarterYear	"Q" & FORMAT & " " & YEAR	e.g. Q1 2017
Day	DAY([Date])	Day of month (1-31)
Weekday Number	WEEKDAY([Date], 1)	1=Sunday, 7=Saturday
Weekday Name	FORMAT([Date], "dddd")	Monday, Tuesday...

Data Quality & Limitations

Issue	Detail	Handling
Lost deal values	All Lost deals: close_value = $0	Used Deal Count instead
GTXPro price	sales_price = $0 in source	Noted as data gap

Account nulls	12% of accounts incomplete	Unknown member in dimension
Single year	Data covers 2017 only	QoQ available, YoY not possible
Engaging nulls	Some Engaging deals missing account	Flagged as data quality issue

Unknown Account Values:

```
employees=0 | office_location=Unknown | subsidiary_of=Unknown | year_established=Null |
sector=Unassigned | revenue=0
```

3. DAX Measures

15+ custom DAX measures organized into 6 categories:

Category	Measures Included	Key Technique
Core KPIs	Total Revenue, Won/Lost Deals, Deal Count, Open Opportunities	CALCULATE + FILTER
Win Rate & Conversion	Win Rate %, Lost Rate %, Win Rate vs Avg, QoQ Win Rate Change	DIVIDE with zero handling
Time Intelligence	Revenue PQ, QoQ Growth %, Win Rate PQ, Win Rate QoQ Change	PREVIOUSQUARTER()
Performance	Avg Close Time, Avg Deal Size, Revenue per Day, Avg Revenue per Agent	AVERAGEX + DATEDIFF
Segmentation	Product Category (Star/Opportunity/Risk/Weak), Account Category	SWITCH(TRUE(), ...)
Dynamic UX	Win Rate/Revenue/Deals (Dynamic), Selected Manager Title, Agent Rank	ISINSCOPE + RANKX

Key DAX Patterns Used:

Win Rate %:

```
DIVIDE([Won Deals], [Won Deals] + [Lost Deals], 0)
```

Avg Close Time:

```
AVERAGEX(FILTER(pipeline, Stage=Won), DATEDIFF(engage, close, DAY))
```

QoQ Growth %:

```
VAR C=[Total Revenue] VAR P=[Revenue PQ] RETURN DIVIDE(C-P, P, 0)
```

Product Category:

```
SWITCH(TRUE(), Rev>=Avg and WR>=Avg, Star, Rev=Avg, Opportunity, ...)
```

Dynamic Matrix Row:

```
IF(ISINSCOPE(sales_agent), [Win Rate %], AVERAGEX(VALUES(agent), [Win Rate %]))
```

Agent Revenue Rank:

```
RANKX(ALL(sales_pipeline[sales_agent]), [Total Revenue], , DESC, DENSE)
```

Selected Manager Title:

```
IF(HASONEVALUE(Manager), Manager + Team Performance, All Agents Overview)
```

Segmentation Measures

Product Category:

```
Product Category = SWITCH(TRUE(), Rev >= AvgRev AND WR >= AvgWR, "Star", Rev < AvgRev AND WR
>= AvgWR, "Opportunity", Rev >= AvgRev AND WR < AvgWR, "Risk", "Weak" )
```

Account Category:

```
Account Category = SWITCH(TRUE(), Rev >= AvgRev AND WR >= AvgWR, "Star", Rev < AvgRev AND WR
>= AvgWR, "Opportunity", Rev >= AvgRev AND WR < AvgWR, "Risk", "Weak" ) -- AvgRev =
AVERAGEX(ALL(accounts_dim[account]), [Total Revenue]) -- AvgWR =
AVERAGEX(ALL(accounts_dim[account]), [Win Rate %])
```

4. Dashboard Pages

Page 0 — Landing Page

Business Question	Project introduction and navigation hub
Audience	All Users
Filters	None

Visuals:

Visual Title	Type	Configuration	Notes
Project Title & Description	Text Box	N/A	Project context
Dataset Stats	Text Box	N/A	8,800 opps, 30 agents, 85 accounts
Business Questions	Text Box	N/A	5 key analytical questions
Key Findings	Text Box	N/A	7 pre-built insights
Data Model Summary	Text Box	N/A	Star Schema overview
Navigation Buttons	Buttons	N/A	Links to all 6 pages

Key Insight: Entry point for all users. Sets context and showcases findings upfront.

Page 1 — Executive Overview

Business Question	What is the overall health of our sales pipeline?
Audience	CEO, Sales Director
Filters	Date Range | Sector | Region

KPI Cards:

Card Title	Value
Total Revenue	$10.01M
Open Opportunities	2,089
Win Rate %	63.15%
Lost Rate %	36.85%

Visuals:

Visual Title	Type	Configuration	Notes
Revenue by Account	Bar Chart	accounts_dim[account]	[Total Revenue]
Revenue by Sector	Bar Chart	accounts_dim[sector]	[Total Revenue]
Regional Performance	Bar Chart	regional_office	[Total Revenue]

Deal Stage Distribution	Donut Chart	deal_stage (Legend)	Count of opportunity_id

Tooltips:

Visual	Tooltip Fields
Revenue by Account	Account | Sector | Total Revenue | Win Rate % | Deal Count
Revenue by Sector	Sector | Total Revenue | Win Rate % | Number of Accounts
Regional Performance	Region | Total Revenue | Win Rate % | Deal Count
Deal Stage Donut	Stage | Count | % of Total

Key Insight: West leads revenue ($3.57M). Retail is top sector ($1.87M). Win Rate healthy at 63.15%.

Page 2 — Team & Manager Performance

Business Question	What separates top-performing teams from the rest?
Audience	Sales Director, VP of Sales
Filters	Date Range | Region | Manager

KPI Cards:

Card Title	Value
Top Revenue Manager	Melvin Marxen
Lowest Revenue Manager	Dustin Brinkmann
Most Active Manager	Melvin Marxen
Least Active Manager	Cara Losch

Visuals:

Visual Title	Type	Configuration	Notes
Revenue vs Efficiency	Scatter Plot	X: Revenue | Y: Win Rate% | Size: Deals | Legend: Manager	Avg lines on both axes
Deal Pipeline Distribution	Stacked Bar 100%	Y: Manager | Legend: deal_stage	Win/Loss ratio per manager
Revenue Mix by Product	Stacked Column	X: Manager | Legend: Series	GTK 500 = Celia only
Win Rate vs Average	Bar Chart	Y: Manager | X: Win Rate vs Avg	Diverging Red/Green colors

Tooltips:

Visual	Tooltip Fields
Scatter Plot	Manager | Total Revenue | Win Rate % | Deal Count | Avg Deal Size | Avg Close Time
Stacked Bar	Manager | Deal Stage | Count | % of Row Total
Stacked Column	Manager | Series | Total Revenue | Win Rate %
Win Rate Bar	Manager | Win Rate % | vs Average (+/-) | Total Revenue

Key Insight: Summer Sewald = most efficient (64.3% WR). Dustin Brinkmann = lowest Avg Deal Size ($1,465). GTK 500 sold exclusively by Celia team.

Page 3 — Agent Performance

Business Question	Which agents are underperforming — and why?
Audience	Sales Manager, Team Lead
Filters	Date Range | Region | Sector | Account | Manager | Deal Stage

Visuals:

Visual Title	Type	Configuration	Notes
Revenue vs Win Rate	Scatter Plot	X: Revenue | Y: Win Rate% | Size: Deals | Legend: Agent	Avg lines on both axes
Agent Scorecard	Matrix	Rows: Agent Name	Rank | Revenue | Deals | Win Rate% |Close Time | Avg Deal | Rev/Day |Sparkline

Tooltips:

Visual	Tooltip Fields
Scatter Plot	Sales Agent | Total Revenue | Win Rate % | Total Deals
Matrix Cells	Agent Name + Column Value

Key Insight: Lajuana Vencill = lowest Win Rate (55%, -8.2% vs avg). Darcel Schlecht = Rank #1 at $1.15M. Dynamic title changes on Drillthrough.

Page 4 — Sales Trends & Performance Drivers

Business Question	How did sales momentum shift across quarters?
Audience	Sales Director, Strategy Team
Filters	Date Range | Region

Visuals:

Visual Title	Type	Configuration	Notes
Monthly Revenue Trend	Line Chart	X: MonthName | Y: Total Revenue + Avg Line	Peak: June $1.34M
QoQ Revenue Change	Waterfall Chart	X: QuarterYear | Y: QoQ Growth %	Q1-Q2: +172%
Win Rate by Series	Line Chart	X: QuarterYear | Y: Win Rate% | Legend: Series	GTK volatile
Quarterly Revenue	Column Chart	X: QuarterYear | Y: Total Revenue	Q2 peak $3.1M
Win vs Lost Ratio	Stacked Column 100%	X: QuarterYear | Legend: Stage	Q1: 82% Won

Tooltips:

Visual	Tooltip Fields
Monthly Trend	Month | Total Revenue | Won Deals | Win Rate % | Avg Close Time
Waterfall QoQ	Quarter | QoQ Growth % | Total Revenue | Won Deals

Key Insight: Q2 peak driven by volume not efficiency. Revenue declining Q3/Q4 despite stable win rates = weaker pipeline activity.

Page 5 — Product Strategy & Performance

Business Question	Which products drive the highest win rates and where should we focus?
Audience	Product Manager, Sales Director
Filters	Date Range | Series Slicer | Product Slicer | Region

Visuals:

Visual Title	Type	Configuration	Notes
Product Performance Matrix	Scatter Plot	X: Revenue | Y: Win Rate% | Size: Deals | Legend: Serie	Avg lines = 4 quadrants
Revenue Decomposition	Decomposition Tree	Analyze: Revenue | Explain: Region > Series > Product	Drill-down capability
Contribution vs Win Rate	Clustered Bar	Product | Revenue Contribution% | Win Rate%	MG Special: 64.8% WR but 0.4% contribution
Product Scorecard	Matrix	Rows: Product	Category | Revenue | WR% | Deals |Price | Contribution | Sparkline

Visual	Tooltip Fields
Scatter Plot	Product | Series | Total Revenue | Win Rate % | Deal Count | Sales Price
Matrix Cells	Product + Column Value

Key Insight: Stars: GTXPro, GTX Plus Pro. Weak: GTK 500, GTX Plus Basic. MG Special highest WR (64.8%) but lowest contribution (0.4%).

Page 6 — Account Intelligence

Business Question	Which accounts and sectors generate the most value — and where are hidden opportunities?
Audience	Account Manager, Sales Director
Filters	Region | Sector | Account | Deal Stage

Visuals:

Visual Title	Type	Configuration	Notes
Account & Sector Matrix	Scatter Plot	X: Revenue | Y: Win Rate% | Size: Deals | Legend: Sector | Details: Account	Hierarchy: Sector > Account
Global Account Map	Map Visual	Location: office_location | Size: Revenue | Color: Win Rate% gradient	Geographic distribution
Account Scorecard	Matrix	Rows: Account	Category | Revenue | WR% | Deals | Sector | Contribution | Employees |

Tooltips:

Visual	Tooltip Fields
Scatter Plot	Sector | Account | Total Revenue | Win Rate % | Total Deals | Revenue Contribution | Number of Accounts
Map Visual	Office Location | Total Revenue | Sector | Account | Win Rate % | Total Deals | Revenue Contribution
Matrix Cells	Account Name + Column Value

Key Insight: Technology sector = best Revenue/Win Rate balance. 12% of accounts have incomplete data (handled via Unknown member).

5. Business Impact

The dashboard delivers actionable intelligence across five dimensions of B2B sales performance, enabling data-driven decisions at the executive, managerial, and operational levels.

Impact Area	Finding	Business Action Enabled
Revenue Concentration Risk	Top agent (Darcel) = $1.15M (11.5% of total). Bottom 5 agents com bined = less than 1 agent.	Identify knowledge transfer needs. Reduce singl e-agent dependency risk.
Product Portfolio Imbalance	GTX Series = 73% of revenue. MG Special has highest Win Rate (6 4.8%) but only 0.4% r venue contribution.	Reprice or upsell MG Special. Reduce GTX over- reliance.
Pipeline Inefficiency	Q2 hit peak revenue ($3.1M) via volume surge — Win Rate dropped 21% from Q1 simultaneously.	Prioritize quality over quantity. Coach agents on deal qualification.
GTK 500 Exclusivity	Only Celia Rouche team sells GTK 500 (West Region). $26,768 pric e point with lowest Win Rate (60%).	Expand GTK training to other teams. Review pricin strategy.

6. Technical Features

Feature	Implementation	Pages Used
Star Schema	4 Dimension + 1 Fact Table	All
Drillthrough	Team Page → Agent Page (by Manager)	Pages 2 → 3
Dynamic Title	DAX HASONEVALUE + SELECTEDVALUE	Page 3
Bookmarks	All Agents reset / Filter Panel toggle	Page 3
Tooltip Pages	Custom report page tooltips	Pages 2, 3, 4, 5, 6
Sparklines	Revenue trend Q1-Q4 in Matrix	Pages 3, 5, 6
Avg Reference Lines	Win Rate & Revenue averages in Scatter	Pages 2, 3, 5, 6
Conditional Formatting	Data Bars | Color Scale | Icon Rules	All Matrix visuals
Time Intelligence	QoQ Growth using PREVIOUSQUARTER()	Page 4
Unknown Member	Null handling for 12% incomplete accounts	Page 6
Page Navigator	Custom navigation on all pages	All
Product Quadrants	SWITCH DAX: Star/Opportunity/Risk/Weak	Page 5
Account Quadrants	SWITCH DAX with account-level averages	Page 6
Win Rate Icons	Green/Yellow/Red based on vs Average	Page 3
